Endego offers **comprehensive solutions for a wide range of automotive lighting systems**, including Zonal Controllers, Signal Light LCUs, and Classic LCUs, ensuring optimal performance and integration. We specialize in advanced systems such as Advanced Front LCUs, AFS LCUs, and HD Lighting, delivering precision control and functionality. Additionally, our expertise extends to No MCU LED systems, providing streamlined, high-efficiency lighting solutions for modern vehicles.

At Endego, we provide end-to-end automotive lighting services, from **System Engineering** and **Software Development** to **Mechanical Design** and **Electronics Development**, ensuring seamless integration across disciplines. Our expertise includes advanced **Optical Simulations, Simulations & Validation**, and comprehensive **CAE Simulation** processes to guarantee high-performance, safety-critical solutions. With dedicated Project Management, we coordinate all aspects of development to meet the highest industry standards, ensuring reliable and efficient lighting systems.

What do we do?

Mechanical Design in CAD

CAE Simulations

Electrical Schematics Design

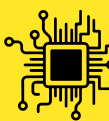

Optical Development

Prototyping

Series Production Support

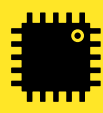

Technical Consulting

PCB Layout Design

System Engineering

Software Engineering

Testing & Verification

Complete solutions provider

We support the development of complete vehicle

From the definition of goals to the production phase support

Technical Specification
